

ZEPHANIA O. ULARE

Full-Stack Developer

Email: ularezephaniah@gmail.com | **Phone:** +254 798 551 128 **Portfolio:** [Portfolio](#) | **GitHub:** [Github](#)

Location: Kenya

PROFESSIONAL SUMMARY

Ambitious Full-Stack Developer specializing in React, Node.js, and Flask architectures. Highly skilled in building secure, responsive, and performance-optimized web applications using modern principles like Privacy-First and Security-by-Design. Proven track record of independently designing full-stack workflows, managing custom token-based authentication systems, and building Progressive Web Apps (PWAs). Eager to contribute scalable clean code, rapid debugging capabilities, and an adaptive development mindset to an innovative software engineering team.

TECHNICAL SKILLS

- **Frontend Development:** React, Tailwind CSS, Vite, Progressive Web Apps (PWAs), HTML5, CSS3, Bootstrap, Framer Motion
- **Backend Engineering:** Node.js, Flask (Python), Django, RESTful API Development, JWT Authentication, Custom Middleware
- **Databases & Storage:** PostgreSQL, SQLite, SQLAlchemy ORM, Cloudinary (Asset Management)
- **DevOps & Deployment:** Git/GitHub, GitHub Actions (CI/CD), Netlify, Render, Railway, Koyeb
- **Security & Architecture:** Security-by-Design, Email Verification & Password Reset Flows, Google/GitHub OAuth, LocalStorage state state-management

ENGINEERING PROJECTS

Daily Scoop — *Full-Stack Developer*

A personalized news aggregation and delivery web application built using React, Tailwind CSS, and NewsAPI.

- Integrated Firebase for asynchronous user authentication, protected routing, and real-time user state updates.
- Engineered clean custom filtering and search algorithms allowing users to curate distinct, personalized feeds.

- Designed a highly responsive UI with Tailwind CSS, ensuring smooth rendering across mobile and desktop environments.

ContactMate — *Frontend Developer*

A centralized, responsive contact management platform managing full client-side CRUD capabilities.

- Implemented real-time client-side search, category filtering, and in-place contact editing using React state hooks.
- Leveraged browser `LocalStorage` APIs to engineer persistent data states without backend server dependencies.
- Applied utility-first Tailwind CSS methodologies to build an intuitive, modern, and highly interactive interface.

EMI Loan Calculator — *Backend Developer*

A Flask-based financial utility engine providing structural amortization breakdowns for loan calculations.

- Developed robust mathematical backend calculation logic using Python and Flask to process precise amortized payments.
- Structured a clean, lightweight architectural layout rendering clear tables for user financial data breakdown.
- Utilized automated validation flows to process user inputs securely before passing data to backend scripts.

Number Hunt — *Frontend Developer*

An interactive browser-based logic game built using standard web engines.

- Programmed responsive game state engine, keeping precise score-tracking counters and state evaluations.
- Managed structural UI updates dynamically using pure, vanilla JavaScript DOM manipulation methods.

EDUCATION

Moringa School (2024 – 2025) *Certificate in Software Engineering*

- Focused on advanced Full-Stack application development, architecture paradigms, and collaborative Git workflows.

St. Peter's Minor Seminary (2020 – 2023) *Kenya Certificate of Secondary Education (KCSE)*

- Grade Attained: **B**

Twin Bird Junior School (2019) *Kenya Certificate of Primary Education (KCPE)*

- Score Attained: **327 Marks**

SOFT SKILLS

- **Clear Communication:** Adept at breaking down technical system architectures into plain, conversational language for cross-functional collaboration.
- **Adaptive Problem-Solving:** Enthusiastic debug coder who enjoys tracking trace logs and fixing tricky architectural or state-management hitches.
- **Attention to Detail:** Committed to maintaining clean, organized folder hierarchies, readable code syntax, and intuitive user flows.
- **Collaborative Mindset:** Enthusiastic about working alongside team members in fast-paced sprints toward shared product delivery targets.

REFEREES

Fr. Elijah Namwaya *Vice Rector*, St. Peter's Minor Seminary
