### Professional Summary

Dedicated Full-Stack Developer skilled in React, Node.js, and Flask. I architect clean, maintainable code for scalable applications, specializing in multi-tenant systems and secure relational databases. Looking to leverage a strong problem-solving mindset and a proven record of delivering independent full-stack projects to drive impact in an innovative development team.

---

### Technical Skills

- **Frontend Development:** React, JavaScript (ES6+), Tailwind CSS, Vite, Bootstrap.
  - **Backend Engineering:** Python, Flask, FastAPI, Node.js, RESTful APIs, MVC Architecture.
  - **Database & Auth:** PostgreSQL, SQLAlchemy, SQLite, JWT Authentication, OAuth (Google & GitHub).
  - **DevOps & Tools:** Git, GitHub Actions (CI/CD), Cloudinary, Vercel, Netlify, Render.
  - **Core Competencies:** Responsive Web Design, Multi-Tenant Architecture, Test-Driven Development (Pytest).
- 

### Projects & Independent Experience

#### SETA (School Management Platform) | Lead Developer (June 2026 – Present)

- Architecting a scalable, multi-tenant school management platform, designing a secure relational backend to enforce **strict data isolation** for hundreds of institutions.
- Leading the full-stack development lifecycle from database schema design to user interface implementation.

#### FeedLoop (Smart Feedback & Follow-up System) | Lead Developer (July 2025)

- Developed the technical framework for a corporate feedback system, building a React frontend and a Python backend to capture and route user follow-ups, increasing lead conversion efficiency.

## Daily Scoop (News Aggregator Web App) | Full-Stack Developer

- Built a personalized news feed using React and a third-party News API.
- Integrated Firebase for secure user authentication and implemented real-time feed filtering, creating a low-latency user experience.

## ContactMate | Frontend Developer

- Developed a responsive contact management application with full CRUD (Create, Read, Update, Delete) capabilities.
- Ensured robust data persistence and security by managing client-side state with LocalStorage and implementing advanced search & dynamic filtering.

## EMI-Calculator | Backend Developer

- Engineered a financial utility application with Python and Flask, calculating detailed loan amortization schedules.
- Designed and implemented the core backend algorithm and connected it to a clean, responsive frontend interface.

---

## Education

- **Bachelor of Science in Computer Science** | University of the People (2026 – Present)
- **Certificate of Software Engineering** | Moringa School (2024 – 2025)
- **Certificate of Secondary Education (Grade: B)** | St. Peter's Minor Seminary (2020 – 2023)

---

## Soft Skills

- **Clear Communication:** Deliver system workflows and documentation with a focus on simplicity.
- **Problem-Solving:** Proven ability to parse complex issues and apply targeted, efficient fixes.
- **Adaptability:** Demonstrate a fast learning curve with new frameworks and integrate feedback effectively.

---

## Referees

- **Fr. Elijah Namwaya**

Vice Rector, St. Peter's Minor Seminary
