

Zephania Owuor

Full-Stack Developer | Nairobi, Kenya

Email: ularezephaniah@gmail.com | **Phone:** +254 798 551 128

| **GitHub:** [github.com/zeph254]

Professional Summary

Aspiring Full-Stack Developer skilled in React, Node.js, and Flask. Passionate about building scalable applications through clean code, structured software architecture, and continuous technical learning. Eager to contribute problem-solving skills, a strong growth mindset, and hands-on full-stack experience to an innovative development team.

Technical Skills

- **Frontend Development:** React, JavaScript (ES6+), Tailwind CSS, Vite, Bootstrap, Framer Motion
- **Backend Engineering:** Python, Flask, FastAPI, Node.js, RESTful API Development
- **Database & Auth:** PostgreSQL, SQLAlchemy, SQLite, JWT Authentication, OAuth (Google & GitHub), Password Reset Flows
- **DevOps & Tools:** Git, GitHub, GitHub Actions (CI/CD), Cloudinary, Vercel, Netlify, Render
- **Methodologies:** Responsive Web Design, Multi-Tenant Database Architecture, Test-Driven Development (Pytest)

Projects & Independent Experience

While I do not have formal industry experience yet, I have built several full-stack applications independently that demonstrate my ability to plan, architect, develop, and deliver production-ready software.

SETA (School Management Platform) | *Lead Developer* (June 2026 – Present)

- Actively designing and developing a scalable, multi-tenant school management software platform MVP.
- Implementing strict data isolation architecture using secure relational backend structures to manage administrative data cleanly across separate institution profiles.

FeedLoop (Smart Feedback & Follow-up System) | *Lead Developer* (July 2025)

- Conceived and developed the technical framework for a smart corporate feedback system.
- Built the frontend using React and wired it to a lightweight Python backend service to capture and manage user follow-ups.

Daily Scoop (News Aggregator Web App) | *Full-Stack Developer*

- Built a personalized news aggregation system utilizing React, Tailwind CSS, and a third-party News API.
- Integrated Firebase to securely manage user authentication, custom profile generation, and real-time news feed filtering.

ContactMate | *Frontend Developer*

- Developed a responsive contact management web application featuring full CRUD capabilities.
- Managed client-side state persistence securely using LocalStorage alongside advanced search and dynamic filtering components.

EMI-Calculator | *Backend Developer*

- Engineered a Python and Flask-based financial utility application providing detailed loan amortization breakdowns.
- Programmed mathematical breakdown logic on the backend and structured clean interface templates with HTML5 and CSS3.

Education

- **Bachelor of Science in Computer Science** | University of the People (2026 – Present)
- **Certificate of Software Engineering** | Moringa School (2024 – 2025)
- **Certificate of Secondary Education (Grade: B)** | St. Peter's Minor Seminary (2020 – 2023)

Soft Skills

- **Clear Communication:** Comfortable detailing system workflows, writing documentation, and explaining technical concepts simply.
- **Problem-Solving & Debugging:** Enjoy parsing complex stack traces, identifying system bottlenecks, and applying targeted fixes.
- **Adaptability & Speed:** Proven track record of picking up new framework standards quickly and iterating based on constructive feedback.

Referees

- **Fr. Elijah Namwaya**

Vice Rector, St. Peter's Minor Seminary
